

# 3º RBQAV Conference

RBQAV - Brazilian Network of  
Bio-kerosene and Sustainable  
Hydrocarbons for Aviation  
(RBQAV)

JUNE

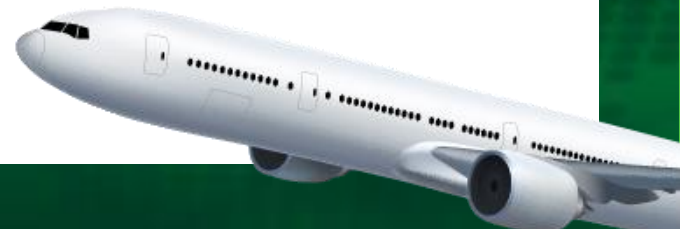

**17th to 19th**

# Welcome

## 3º RBQAV Conference

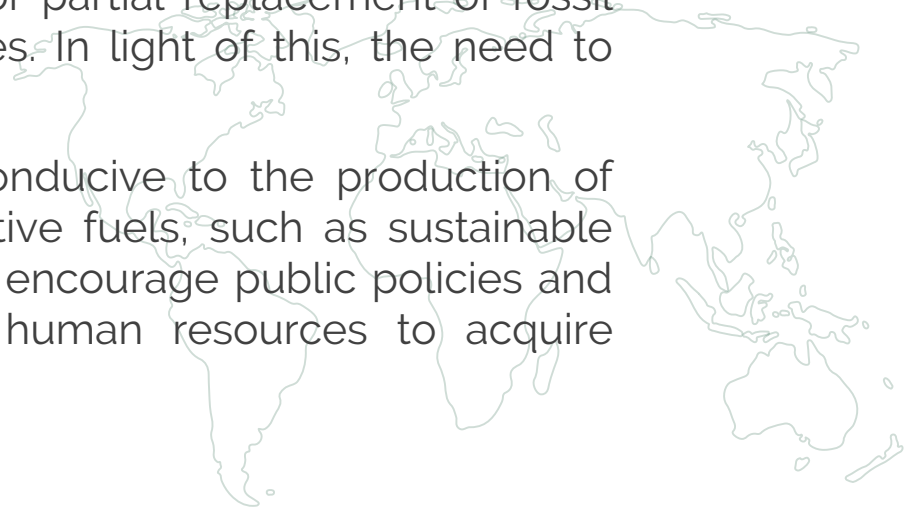

The 3rd Conference of the Brazilian Network of Bio-kerosene and Sustainable Hydrocarbons for Aviation aims to promote interaction among various stakeholders involved in the production and use of alternative fuels for aviation and sustainable hydrocarbons. It seeks to contribute to the further development of this sector and its dissemination.

# Welcome

The international aviation sector has entered into an agreement to neutralize emissions starting from 2022, a goal that can only be achieved through the total or partial replacement of fossil fuels with renewable alternatives. In light of this, the need to structure the sector is essential.

To promote an environment conducive to the production of bio-kerosene and other alternative fuels, such as sustainable hydrocarbons, it is necessary to encourage public policies and research, as well as to train human resources to acquire technical expertise.

# Meeting Description

It is an important event for the scientific and technological landscape of the country, where participants have the opportunity to expand their knowledge, gather a significant amount of information, and engage in discussions on various topics. These discussions are likely to bring benefits to professional qualification and to the companies and institutions to which the participants belong.

# Participants

The target audience will consist of researchers from educational and research institutions, professionals from aviation and fuel-related companies, the biofuel industry, representatives of entities, service providers, freelance professionals, and undergraduate and graduate students.

# Event Activities

Throughout the three days of the event, there will be lectures and roundtable discussions with national and international experts, presentations of scientific and technical papers in both oral and poster formats, as well as panels discussing topics of interest in the sustainable energy production sector for aviation. Concurrently with the event, there will be a fair where companies can showcase their products, services, and projects.

# Iguassu Falls

## Paraná | Brazil

The 3rd Conference of the Brazilian Network of Bio-kerosene and Sustainable Hydrocarbons for Aviation is scheduled to take place from **June 17 to 19, 2024, in Iguassu Falls, Paraná, Brazil, at the Wish Foz do Iguaçu Resort.** Iguassu Falls, located in the western part of Paraná, Brazil, covers an area of 617,701 km<sup>2</sup>, with 61,200 km<sup>2</sup> being urbanized. It has approximately 285,415 inhabitants (as of the 2022 census) and is situated 643 km away from Curitiba, the state capital.

As a significant tourist destination, Iguassu Falls is the third most visited by foreigners in Brazil, renowned for the Iguassu Falls and the Itaipu Hydroelectric Power Plant. Being part of a trinational region with Ciudad del Este in Paraguay and Puerto Iguazú in Argentina, it shares borders with these countries. The name 'Iguaçu', of indigenous origin, means 'big water', and its residents are known as 'iguazuenses'.
